

Silent Running TM

SR 1000...complete coverage for all your noise and vibration problems.

Silent RunningTM SR 1000 is a high performance, viscoelastic coating used to dampen vibration and reduce unwanted noise. Vibration and noise energy is converted into low grade heat and dissipated throughout the applied surface.

- Silent RunningTM can be applied in engine rooms, gen sets, covers, enclosures and bow thrusters.
- Silent RunningTM is a VOC compliant, water based, non-toxic coating.
- Silent RunningTM has excellent adhesion properties to all surfaces, including metal, fiberglass, wood, and most plastics.
- Silent RunningTM is easily applied by using a sprayer, a brush or a roller.
- Clean up is quick with water.

SR1000 Marine Coating

SR 1000 Marine Coating has been awarded:

- United States Coast Guard Approval
- Accreditation by the Member States of the European Union

Silent Running™ SR 1000 Marine Coating

- Water Based and Non-toxic
- Non-Flammable, Self Extinguishing
- Easy Application, Spray, Brush or Roller
- Quick Clean-up with Water
- Permanent Coating
- Wide Temperature Range: -30°F to 250°F
- Excellent Adhesion

Silent Running™ SR 1000 – Marine Coating

- U.S. Coast Guard Approval No. 164.106/41/0; 164.112/141/0; 164.117/40/0
European Union Approval No. 1408/11
- Meets or exceeds Section 10 of the IMO Resolution A.653(16) and Resolution MSC.61(67) for flammability and toxicity
- Use on the hull, stringers, engine beds, bulkheads, ceiling, hatches, engine boxes, bow thrusters, generator covers and enclosures
- Can be used on all surfaces, including fiberglass, aluminum and steel
- Will not chip or crack due to expansion or flexing of the substrate to which it is applied
- Saves Labor, Space and Time
- Covers 30 square feet per gallon at approximately 40 mil thickness
- Resistant to gas, oil, and most chemicals
- Dries to a hard surface while retaining excellent elongation
- Non-flammable, should it come in contact with flame and it is self-extinguishing
- Dries to an off-white color brightening enclosed areas
