

Sugar Industry

TEMP-COAT 101® is the premier liquid ceramic thermal coating designed to insulate surfaces ranging from -80°F to +350°F. TEMP-COAT 101® fits well with the sugar industry as it is non-friable, food safe and not effected by moisture intrusion.

Benefits:

- Low thermal conductivity providing effective insulation with thin films
- Seam-less barrier with the ability to easily cover complex geometries.
- Personnel protection providing safe touch surfaces
- High elongation to expand and contract with the substrate.
- Fast application with the ability to be installed while the system is in operation.
- Extremely cost efficient
- Product may be tinted to match system colors.
- 10 year Product Warranty
- Over 23 years history serving all major industrial, commercial, and marine sectors

Possible System Uses:

- Clarifiers
- Sugar Dryers(Shakers)
- Heat Exchangers
- Steam piping
- Hot air ducting
- Storage Vessels
- And many others
